

Criteria	Poor	Average	Great	Score
Presentation : 20%	Presentation is unclear, poorly organised, or missing presenting (0-5)	Presentation is clear enough and delivered with some confidence. (6-14)	Presentation is clear, well organised, professional, and delivered with great confidence. (15-20)	
Website Design, Functionality & Accessibility : 20%	Website is incomplete or difficult to use, with limited CRUD functionality, inconsistent design, and poor layout, navigation, or accessibility. (0-5)	Website is functional and mostly easy to use, with basic CRUD functionality, a fairly consistent design, and acceptable layout, navigation, and accessibility. (6-14)	Website is fully functional, easy to use, and well designed, with complete CRUD functionality, consistent design, and strong layout, navigation, and accessibility. (15-20)	
Database Definition : 20%	Database design is weak or incomplete. Tables/relationships are unclear. SQL script is missing parts or has major errors. (0-5)	Database includes the required related tables and basic relationships. SQL script works with some minor issues. ERD is acceptable. (6-14)	Database is well structured with clear relationships and correct SQL definition. ERD is complete and accurate. Design strongly supports the application. (15-20)	
GitHub Upload: 10%	Incomplete repository, missing required files, or little/no evidence of version control. (0-3)	Repository contains most required files but has limited documentation, organisation, or commit history. (4-7)	Complete, well-organised GitHub repository with source code, hand-written SQL setup script, README, and regular commit history. (8-10)
